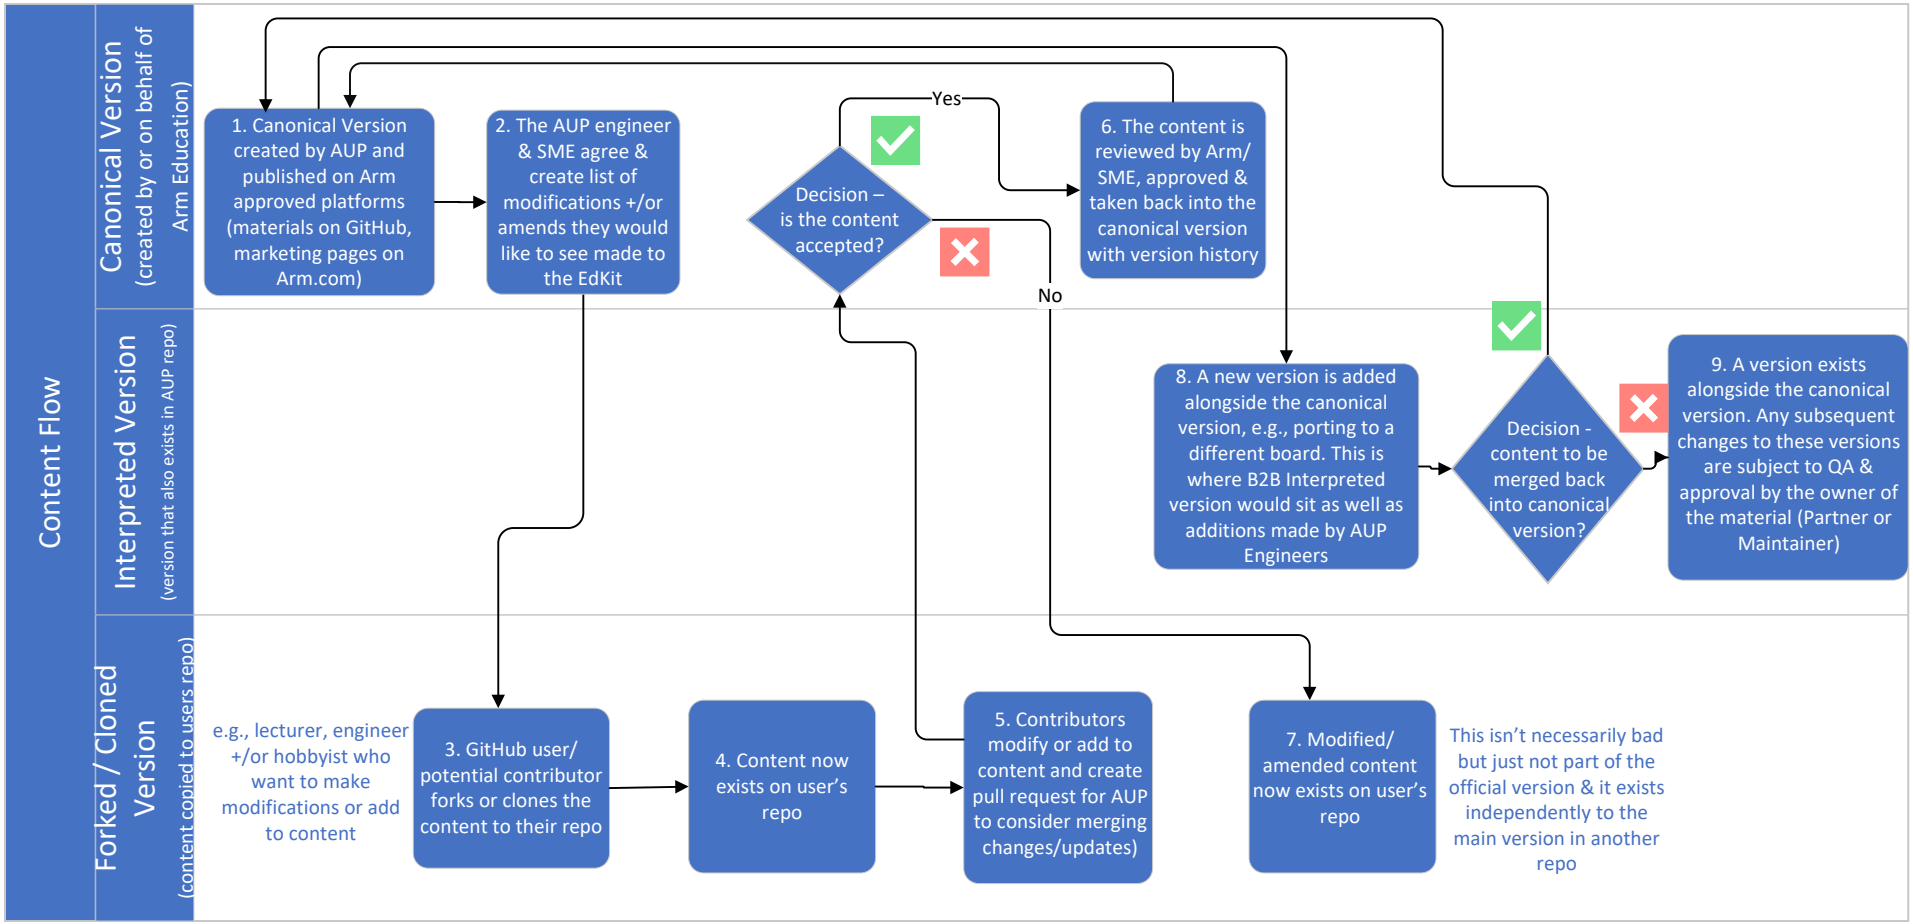
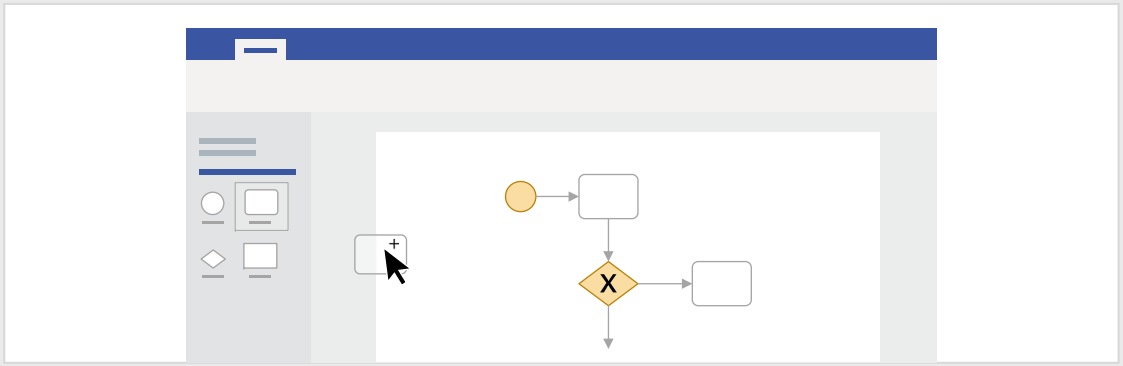
Openly accessible content which can be created with and without Arm endorsement



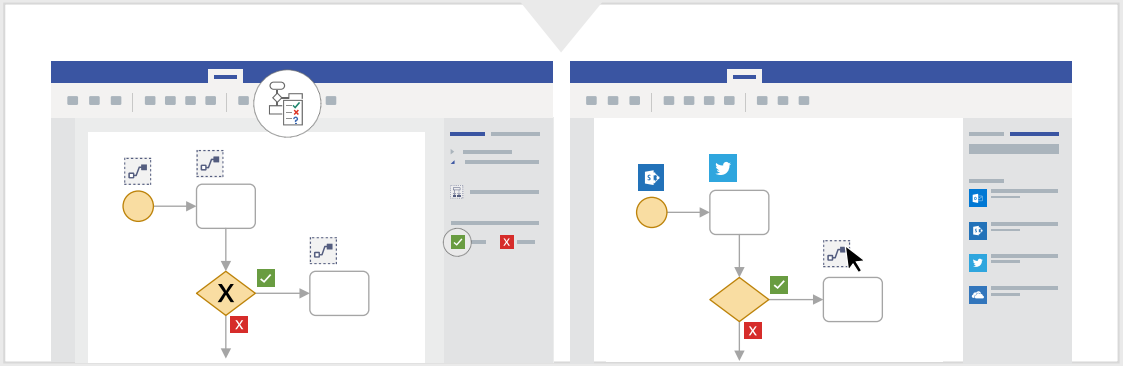


1

Open or create a BPMN diagram

Open an existing BPMN diagram or create a new one using the BPMN stencil.

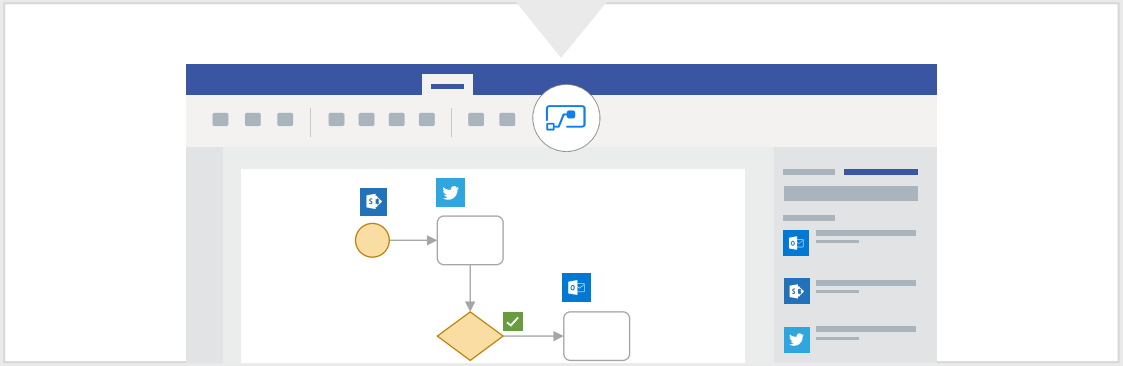
To access the BPMN stencil, go to Shapes > More Shapes > Flowchart > BPMN Basic Shapes.



2

Prepare to export

When you're ready, select Prepare to Export under the Process tab. Next, configure the gateways under the Flow pane settings tab. Finally, select the placeholders on the canvas and choose the appropriate trigger or action from the Flow pane.



3

Export your diagram to Microsoft Flow

Under the Process tab, select Export to publish the diagram to Microsoft Flow.
